

PU on Cast Iron Core (Red)

Wheel Features

Tread Material:	PU	Core Material:	Cast Iron
Bearing:	Ball Bearing	Tread Hardness:	95A±3
Temperature:	-25°C~60°C	Running Speed:	4km/h

- 2 precision ball bearings, flexible rotation
- 💎 Polyurethane on casting iron core,high load capacity,wear resistance,oil resistance
- Environmental protection, quiet, effectively protect the floor
- With iron covers, thread-proof design
- Painted,anti-rust and anti-corrosion
- High temperature and humidity may shortened service life

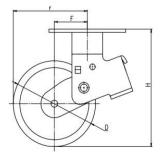

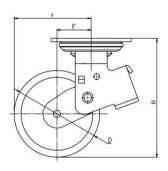

Rolling resistance	Very good
Wear resistance	Excellent
Operating noise	Very good
Floor surface preservation	Very good

Bracket Features

- ON/OFF pedals, stable braking effect, easy to operate
- 🕢 Steel plate pressed and fully welded, firm and strong
- 📿 Dustproof ring effectively protects grease for long sevice life
- 🕢 Double springs plus cushion block design,large cushion range,outstanding shock absorption performance
- 💎 Powder spray treatment,superior anti-rust and anti-corrosion performance,salt spray test over 72 hours
- Wheel brake only, without direction lock function

Product Details

ON/OFF brake is easy to operate.

Double spring and polyurethane block design, large retraction stroke, shock absorption performance is better, can effectively buffer and ensure balance and stability.

Double-welded, strong and robust. Dust ring can effectively protect the dust and grease lubrication.

Arc wheel surface can move easily. Iron cover is nice appearance and antiwinding.
